A: I am happy to report that finally our detective work paid off; the question was well received, and another human being was able to answer it. As far as the.rar file is concerned, it uses TrueCrypt for encryption. A: A.rar file is just like any other compressed file. It has parts which are

password protected so that you can't see the whole thing. The encrypted password is so that you can't open the file without the key or passphrase. If the key or passphrase is the same as the password for the file it's the same as having no password at all because the file is no longer password protected. As to why it's stopping at 2012 - no idea. The file seems to be decrypting alright, just not completing. . It's stalling on the 5th password, which is the last one. . The 5th password is incorrectly calculated and is the first one. The md5 of the file is whasserjkaz, apparently. Corrected.
