The .22 pistol has been a handy practice weapon for years, but is it any good for practice shooting? Check out the pros and cons here. You must be able to quickly draw your pistol and open fire within a split second. At this point, the pistol should be pointed at an imaginary target with the barrel up and the index finger firmly on the trigger. Aiming is usually done at the bottom third of the target. When the weapon is on the safety, you do not need to aim. Instead, you need to quickly aim at the top of the target to see the result of the first shot.
